Patented Temperature Control System

25°C, 30°C, 35°C, 40°C Adjustable according to patient sensitivity, ensuring a truly comfortable treatment experience.

China Patent No. CN216481629U

Patented Powder Container

Unique airstream design delivers more even powder distribution, stable atomization, and a cleaning performance that is both thorough and gentle.

China Patent No. CN112336482B, CN218922818U, CN218684752U

Consumable Replacement Alert

Automatic maintenance alert with a QR code linking to a step-by-step video guide, making maintenance simple and intuitive.

Auto Timer Handpiece Self-Cleaning

Intelligent anti-clog system periodically rinses internal tubing to maintain smooth powder flow and extend device lifespan.

Ultra-clear 5.5-inch Screen

Offers 12 power settings for precise control and fully personalized treatments.

Automatic Waterline Cleaning

Two selectable cleaning durations reduce the risk of biofilm accumulation inside tubing.

Cleaning Mode

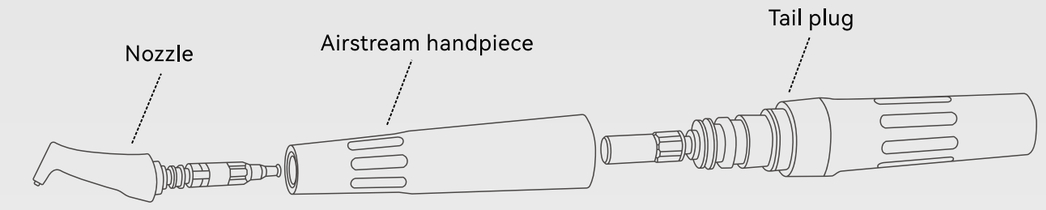

Water-only output, ideal for rinsing or cleaning the treatment area.

Boost Mode

Zero-delay instant power increase for airstreaming.

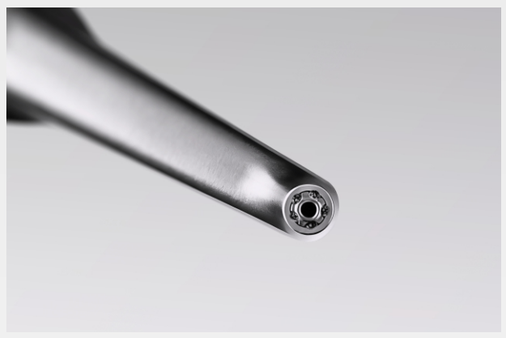

Waterless Mode

Air-only output, ideal for drying the treatment area or preparing before a procedure.

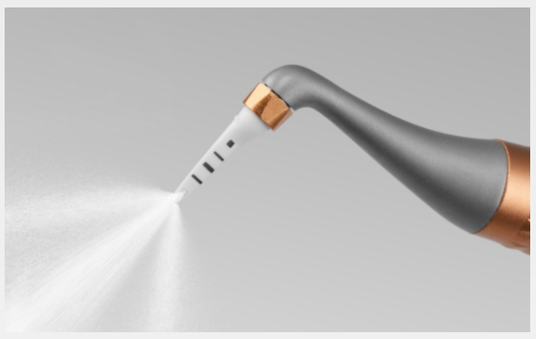

Three-part Detachable Handpiece

Reduces powder blockages, easy to clean and maintain internal channels.

Precision Coverage with Minimal Powder Overspray

0.7 mm nozzle focuses the airstream and powder for efficient cleaning. The coaxial water-and-air design envelops the powder stream with water, minimizing overspray. Fluid-dynamic engineering delivers gentle force release, protecting teeth and soft tissue.

Gentle & Minimally Invasive Periodontal Pocket Cleaning

Patented nozzle design ensures precise control of the powder-to-water ratio. Rotates freely 360° and is pre-curved for flexible access to hard-to-reach areas, protecting teeth and soft tissue.

Targeted Airstream for Effective Biofilm Removal
